

CIA Factbook for Oceana

Geography:

- Climate: tropical, wet, hot.
- Borders: continental state in one block, with 4 neighbors (with 2 of them, part of a Schengen-like space), 1 oceanic side to the east
- Natural resources: tropical wood, gold, sugar, coffee, iron, nickel, uranium; huge amazonian forest
- Other: country is in a strategic location for both commercial and military interests.

People and Society:

- Population: 200 millions
- Urbanization: 95% into a city
- Major Urban Centers:
 - o Ocea (capital; administrative and economic center; international airport)
 - o Gracela (industrial manufacturing area, major port city; regional airport)
 - o Borceia (industrial manufacturing; agricultural hub; regional airport)

Government:

- Type: federal republic
- Legal system: civil law; review of administrative but not legislative acts
- Political leadership: liberal party- (PDO- Party for a Democratic Oceana)
- Opposition: communist party- (OCP- Oceanic Communist Party) nationalist party-(MCN- Movement for Conservative Nationalism)
- International organizations: permanent member of the UNSC, member of the (EU-like union between Oceana, Widjhai and Bailloc) Tropical Union, member of the Non Proliferation Treaty, member of the military organization GATO
- Other: The current administration came to power in the most recent election by a very slim majority. They took over the government from the OCP, which had been in power since the revolutions of the 1950's. The OCP cooperates with the current government, but is also looking for opportunities to reclaim power. The MCN has become increasingly popular, particularly in rural agricultural and poor urban areas because of high unemployment.

Economy:

- GDP per capita: \$16 000
- Agriculture: coffee, cocoa, rice, citrus, beef, sugar cane, cocaine
- Industry: textile, shoes, pharmaceutical, steel, cellphones/laptops, automobile, weapon
- % Population below poverty line: 21%
- Exports: coffee, automobile, soy beans, cellphones & laptops, medicines, weapons
- Imports: oil, electronics, chemical products, electrical equipment
- Other: Oceana is a net exporter of manufactured goods. Despite the development of alternative energy sources, Oceana remains dependent on oil imports for maintaining the industrial sector. International trading partners have become more cautious after the recent power shift in government. The

economic crisis has taken its toll. These two factors have contributed to the high unemployment rates and a slowdown in foreign investment.

- The Goldman and Roswell International (GRI) group has historically been one of the most important economic partners, promoting industrial and technological development, investing in educational projects and developing the manufacturing sector. Not only is this corporation significantly involved in the country's economy, but their involvement encourages other international investment.

Energy:

- Sources of energy and their reliability: solar, wind, hydroelectricity, nuclear

Communications:

- Communications infrastructure: cellphones, internet but there are Amazonian zones where there is no infrastructures
- Broadcast media: Radiobras (radio and TV media) controlled by the government
- Other : half of the population has a good Internet connection
- The recent change in government reduced a lot of the restrictions previously placed on journalists. The Radiobras media is still technically controlled by the government, but they are including more alternative and critical voices. The spread of internet has been hard to control and has led to increased exposure to foreign media and citizen journalism.

Transportation:

- Transportation infrastructure: airports, railways, metro, ports, roadways
- 12 major regional airports, plus the international airport in the capital Ocea.
- Railways and roadways connect major population centers. Rural areas are less well-served by mass transportation.

Military:

- Manpower: 1.5 million professionals (80 million people available thanks to the military service)
- Supplies: nuclear weapon, air force, navy force, land force, air naval force

Transnational issues:

- International disputes:
 - Oscearta: Oceana has had a long-standing dispute with Oscearta dating back to colonial era. Although quite similar linguistically and culturally, at the time of independence, there was conflict over which country would be given control over the important economic hub city of Graceia. Although the majority of the population considered themselves Osceartan, the city was granted to Oceana. The later economic decline of Oscearta has increased tensions over the years leading to a small stockpile of nuclear weapons. Occasional border skirmishes threaten the current ceasefire.
 - Bikteim: The recent Oceanic elections that toppled the communist party's 60 year hold on the country did not resonate in Bikteim, which remains controlled by the communist party. The population supports the Bikteim government. Bikteim is in the process of adjusting to their neighbor's new regime.
- Tropical Union
 - Bailloc: Bailloc is a member of the TU. Because of its world-famous beaches, Bailloc has become an international tourist destination.
 - Widjhai: Widjhai is a landlocked country in the middle of the continent, and is strongly dependent on its neighbors. Rich in minerals and mining industry, the country has few other resources. Major supplier of raw materials for Oceanic manufacturing.
